

CONFECTIONERY INDUSTRY

Tradin Organic provides 100% certified organic confectionery ingredients sourced through our own global sourcing projects. The cocoa beans are processed at our own plant, Crown of Holland, into a range of fully traceable cocoa butters, liquors and powders.

Global Sourcing

With over 40 years of experience and sourcing from over 60 countries, our global network and presence at origin ensure a stable and consistent supply. Offering almost all ingredients used in the confectionery industry, all of our products are 100% organic.

We heavily invest in expanding and further improving our growing global network of certified organic suppliers. Our worldwide sourcing initiatives receive tailored agronomical support and investments in processing facilities and food safety procedures.

Organic Integrity

A direct sourcing model and in-house quality monitoring are key elements in ensuring organic integrity and product quality all the way from the farm to your door.

Food safety and quality programs led by our dedicated Quality Assurance team closely monitor all links of the supply chain to guarantee the safety and integrity of our products.

Service

Our extensive storage capabilities enable us to ensure just-in-time deliveries. We provide contract management, payment terms, and strategic advice regarding market and price developments to empower our customers in making well-timed and informed purchasing decisions.

CONFECTIONERY INDUSTRY

We offer a combination of innovative organic ingredients, competitive pricing and efficient service. From sugars, cocoa products to vegetable oils – we offer anything you need in organic quality or with various certificates.
